

# Maryland Strategic Energy Investment Fund

## Report on Fund Activities FY 2016

*prepared by the*  
Maryland Energy  
Administration

## Table of Contents

Introduction

### MEA Programs

- A. Clean Energy Communities Low-to-Moderate Income Grant Program
- B. Clean Energy Grant Programs
- C. Maryland Smart Energy Communities
- D. Commercial and Industrial Grant Program
- E. Kathleen A. P. Mathias Agricultural Energy Efficiency Program
- F. Next Generation Energy Efficiency for the Industrial Sector
- G. Game Changer Competitive Grant Program
- H. Offshore Wind Development Program
- I. Community Wind
- J. Transportation Programs
- K. Combined Heat and Power (CHP) Program
- L. Animal Waste-to-Energy Pilot Program
- M. Energy Technical Support
- N. Communications and Marketing
- O. Administration
- P. Maryland Clean Energy Center support

### Non MEA Programs

- Q. Department of Human Resources Low Income Bill Payment
- R. Department of Housing and Community Development
- S. Maryland Department of the Environment
- T. Electric Vehicle Excise Tax Credit
- U. Department of General Services
- V. DBM State Energy Loan Repayments

Appendix A: SEIF Funding Details

Appendix B: FY16 Awardees receiving multiple awards

Appendix C: FY16 Awardees

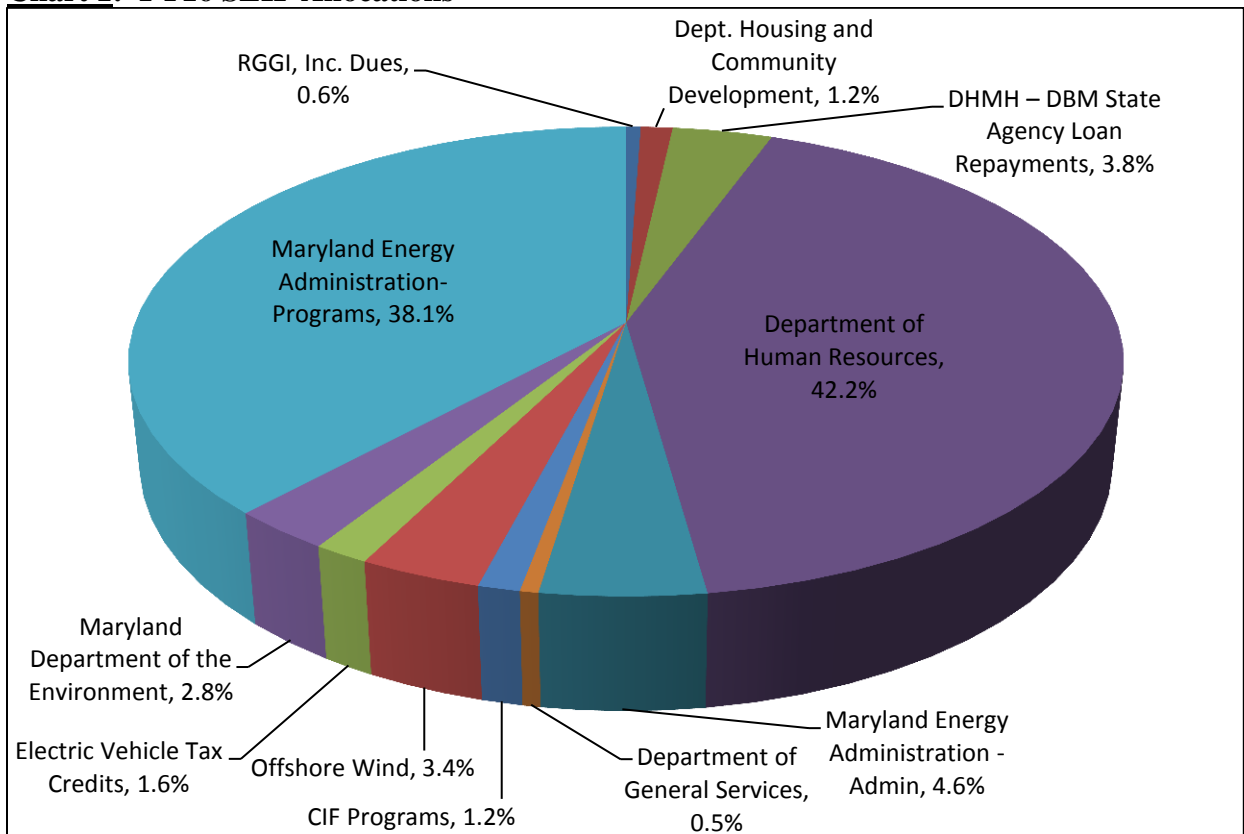

## INTRODUCTION

Pursuant to Section 9-20B-12 of the State Government Article, the Maryland Energy Administration (MEA) is required to prepare an annual report to the Governor and General Assembly. This report, among other things, describes the expenditures of the Strategic Energy Investment Fund (SEIF); grants awarded; energy savings estimated; and programs, projects and activities conducted. The data in this report demonstrates the achievements being made towards promoting affordable, reliable, and cleaner energy for the benefit of all Marylanders.

On behalf of the State, MEA implements its charge through innovative and effective policies, programs, technologies, and financing mechanisms using funds from the SEIF. These programs help reduce household bills, address global climate change concerns, create jobs, attract and retain business, and promote energy independence. In addition to MEA directed programs, funds from the SEIF are allocated to a variety of other agencies that also work to achieve energy and climate-related goals.

A breakdown of the FY16 SEIF allocation is provided in the pie chart directly below.

**Chart 1: FY16 SEIF Allocations**

The SEIF is comprised of a variety of funding sources. The main source of proceeds is from Regional Greenhouse Gas Initiative (RGGI) auctions. The fund also includes income from the Exelon-Constellation merger settlement (the Offshore Wind Development Account and the Customer Investment Fund (CIF)), other Public Service Commission (PSC) orders, Alternative Compliance Payments from entities that are required to comply with the State's Renewable Portfolio Standard, and a few other minor sources of funds. Appendix A details each source for each amount received by the fund, along with a detailed accounting of disbursements from the fund. This appendix also includes details on RGGI auctions, including the number of allowances sold, allowance prices, and estimated future revenues.

Details describing activities funded through the SEIF are provided in the narratives and charts that follow. In addition, MEA annually provides a report on all disbursements over \$25,000 to the Department of Budget and Management (DBM), which publishes the data on its Funding Accountability website. Appendix B provides a list of FY16 grantees receiving multiple SEIF-funded awards from MEA, while Appendix C depicts SEIF amounts disbursed to FY16 awardees.

## MEA PROGRAMS

### A. Clean Energy Communities Low-to-Moderate Income Grant Program

*SEIF Expenditures and Encumbrances: \$9.41 million*

#### *Beneficiaries*

Non-profits and local governments can receive funding from this program to implement energy efficiency measures that benefit low-to-moderate income Marylanders. Past awardees include non-profits (e.g., Habitat for Humanity affiliates), community action agencies, housing authorities, and county and local governments.

#### *Description*

Grants are awarded to projects that generate significant energy savings through energy efficiency, with the benefits of the energy savings being passed on to Maryland’s low-to-moderate income residents. Priority is given to projects that maximize energy savings and the number of low-to-moderate income residents that benefit from the measures. Through FY14, MEA allocated grant funds to each county formulaically based on population and income levels. Applications were then evaluated competitively on a county-by-county basis, ensuring a fair distribution of funds across the State. In FY15 and FY16, the program was expanded to include a statewide competition for larger projects that can help buildings or communities take advantage of economies of scale. Past projects include residential whole building upgrades and energy efficiency improvements to homeless shelters. In the appendices, the name of the Clean Energy Communities Low-to-Moderate Income Program awardee is followed by the geographical location where program activities are being completed.

FY16 projects are still being installed. For this reason, the anticipated total estimates for FY16 are based on results from previous fiscal years. Some energy measures may be benefitting from other funding sources.

#### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY16</b>
# of grants	50
Annual kWh savings estimate for energy measures completed to date	2,550,596
Annual MMBTU savings estimate for energy measures completed to date*	3,056
Anticipated total kWh savings (once all FY16 projects are completed)(annual)	4,000,000
Anticipated total MMBTU savings (once all FY16 projects are completed)* (annual)	19,500

\*Note: Includes natural gas, propane, and #2 fuel oil

## B. Clean Energy Grant Program

*SEIF Expenditures and Encumbrances: \$4.66 million*

### *Beneficiaries*

Beneficiaries include homeowners, businesses, nonprofits, and State and local government entities that install renewable energy systems.

### *Description*

MEA's Clean Energy Grant Program (CEGP) is designed to support renewable energy installations across the State of Maryland. The Clean Energy Grant Program provides incentives for solar photovoltaic, solar water heating, geothermal heating and cooling, and wind energy systems. Beginning in FY14, the program also included incentives for commercial-scale solar photovoltaic canopy systems that include charging for electric vehicles and community wind projects. Residential incentive levels are set at a fixed amount while commercial incentive levels are established based on the size and type of the renewable energy system. The number of grants processed as part of the CEGP program highlights the popularity of the program.

Some of the commercial scale projects funded in FY16 are still being installed. Savings and capacity estimates for these projects are included in program details below, but are subject to change.

### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY16</b>
# of grants	2941
Estimated annual savings (kWh)	23,248,673
Solar PV Capacity (kW)	14,919
Solar Thermal Capacity (SF)	3,882
Geothermal Capacity (Ton)	2450
Wood Stove Capacity (btu/hr)	35,311,559
Solar PV Canopy Capacity (kW)	2,538
Wind Capacity (kW)	8.9

### C. Maryland Smart Energy Communities

*SEIF Expenditures and Encumbrances: \$ 1.83 million*

*Beneficiaries:*

Local incorporated governments (towns, cities and counties) benefit from this program. Examples of Maryland Smart Energy Communities participants include cities such as Rockville, Baltimore City, Brentwood, Cumberland, Cambridge, and Aberdeen, and counties including Calvert, Frederick, and Anne Arundel.

*Description:*

The goal of the Maryland Smart Energy Communities (MSEC) program is to have local governments adopt energy policies and commit to them for the long term, leading to sustained energy savings and additional opportunities for renewable energy development. Once adopted into the program, the local government enacts energy goals and develops an energy baseline. Once the local government has successfully adopted at least two out of three energy policies (i.e., energy efficiency, renewable energy, and transportation), it can leverage program funding to assist with energy projects that help achieve its MSEC goals. Maryland Smart Energy Communities gain a better understanding of their energy usage, enabling them to reduce energy costs and help achieve the State's energy and environmental goals.

*Program Accomplishments*

MSEC now has a total of 64 Maryland communities that have participated in the program, across multiple fiscal years. 24 MSEC awards were made in fiscal year 2016.

Energy savings estimates shown below are only based on the awards to MSEC communities that have participated in the program in previous fiscal years as new MSEC communities accepted into the program in FY16 are still developing their specific energy projects. As energy projects are still being implemented, savings estimates are subject to increase.

<b>Fiscal Year</b>	<b>FY16</b>
# of awards to municipal governments	16*
# of awards to county governments	8
# of communities adopting energy efficiency policies adopted to date	62
# of communities adopting renewable energy policies adopted to date	50
# of communities adopting transportation policies adopted to date	24
Estimated Annual savings (kWh)	1,168,503
Anticipated Solar PV capacity (kW)	126.24
Anticipated Gasoline gallon equivalents (GGE)	15,066

\*Note: One new MSEC community dropped out of the program after signing the grant award.

**Maryland Smart Energy Communities Program Participants to Date**

1. Aberdeen	2. Anne Arundel County	3. Baltimore City
4. Baltimore County	5. Bel Air	6. Berlin
7. Berwyn Heights	8. Bladensburg	9. Boonsboro
10. Bowie	11. Brentwood	12. Calvert County
13. Cambridge	14. Capitol Heights	15. Cecilton
16. Chestertown	17. College Park	18. Cottage City
19. Cumberland	20. Denton	21. District Heights
22. Easton	23. Edmonston	24. Emmitsburg
25. Fairmount Heights	26. Federalsburg	27. Forest Heights
28. Frederick	29. Frederick County	30. Frostburg
31. Gaithersburg	32. Garrett County	33. Glenarden
34. Greenbelt	35. Greensboro	36. Hagerstown
37. Harford County	38. Highland Beach	39. Hyattsville
40. Landover Hills	41. Manchester	42. Millington
43. Montgomery County	44. Mount Rainier	45. North Beach
46. Ocean City	47. Oxford	48. Prince George's County
49. Princess Anne	50. Ridgely	51. Riverdale Park
52. Rock Hall	53. Rockville	54. Salisbury
55. Seat Pleasant	56. Snow Hill	57. Somerset
58. Takoma Park	59. Talbot County	60. Taneytown
61. Thurmont	62. University Park	63. Westernport
64. Westminster		

## D. Commercial and Industrial Grant Program

*SEIF Expenditures and Encumbrances: \$1.66 million*

### *Beneficiaries*

The Commercial and Industrial (C&I) Grant Program offers financial incentives to the commercial and industrial building sector. Program participants include warehouses, manufacturers, hospitals, and religious facilities.

### *Description*

The C&I Grant Program resulted from the recognition that the commercial and industrial sectors still had significant opportunities to save energy. In its third year in FY16, the C&I Grant Program provides competitive grants to commercial and industrial applicants to install energy efficiency measures that achieve deep reductions in total building or space electricity usage. Grants cover up to half of the total project cost after utility incentives and other leveraged funds are applied.

### *Program Accomplishments*

Some projects funded through this program have long lead times and many are therefore still being installed. FY16 annual savings estimates below reflect the projections of the electricity reductions that are anticipated to accrue from program-funded projects, but are subject to change. The summary report below shows anticipated total project savings, including energy savings from any energy measures that may be benefitting from other funding sources, including utility incentives.

<b>Fiscal Year</b>	<b>FY16</b>
# of grants awarded	10
Annual savings (kWh)	3,842,053

## **E. Kathleen A. P. Mathias Agricultural Energy Efficiency Program**

*SEIF Expenditures and Encumbrances: \$0.57 million*

### *Beneficiaries*

The program benefits farms and businesses in the agriculture sector.

### *Description*

The Kathleen A. P. Mathias Program was offered for the fourth time in fiscal year 2016. The program is designed to highlight cost-effective energy improvements in the agriculture sector. The FY16 program focused on energy efficiency upgrades being done in aggregation with renewable energy upgrades to highlight best practices. Examples of funded projects include air sealing, motor, lighting and solar upgrades.

### *Program Accomplishments*

This program has demonstrated that cost effective retrofits can include renewable energy generation in Maryland's agriculture sector. Through the program, MEA creates case studies and shares information on the projects, giving farms and businesses in the agriculture sector a local example and helping them to make informed decisions about pursuing similar upgrades on their own. MEA shares the case studies and project examples on the program website and through other venues. The overall goal of the program is to highlight best practices and cost-effective retrofit opportunities.

Some projects funded by FY16 grants are still being installed by grantees. The annual savings estimates shown below are based on initial audit estimates. FY16 energy savings will be finalized as part of the project close-out process once all measures are installed. The final savings will be posted on the program website.

<b>Fiscal Year</b>	<b>FY16</b>
# of grants	14
Estimated Annual savings (kWh)	1,687,000
Estimated Annual savings (MMBTU)*	3,955

\*Note: Includes propane, natural gas, and diesel

## **F. Next Generation Energy Efficiency for the Industrial Sector**

***SEIF Expenditures and Encumbrances: \$0.97 million***

### *Beneficiaries*

Maryland manufacturers located within the Baltimore Gas and Electric Service territory benefit from this program.

### *Description*

Through the Customer Investment Fund (CIF) the Next Generation Energy Efficiency Gains (NGEEG) program funds training and consulting efforts that help Maryland manufacturers in the BGE service territory implement energy efficiency upgrades by compelling management and employees of the ROI benefits. Additionally, the program works with participants to help them access resources in the forms of grants, rebates, and other financial resources available in the State to implement energy efficiency measures. The Regional Manufacturing Institute (RMI) is the program implementer and MEA's role consists of disbursing the CIF funds while providing financial, consultation, and outreach support and oversight.

### *Program Accomplishments*

In FY16, 61 manufacturing companies have been served under the Tier I portion of the program and 147 under the Tier II services. Participating manufacturers have realized a calculated electricity reduction of 7,707 MWh and 1.586 MW of demand from October 2013 through June 2016. It should also be noted that during FY16, the NGEEG Program collectively identified an estimated 25,254 MWh of electricity reductions, 5.559 MW of PJM demand savings, and annual electric cost savings of \$2,391,934. This brings the cumulative totals to 48,596 MWh, 12.038 MW of demand, and \$5,131,934 in electric cost savings.

## G. Game Changer Competitive Grant Program

*SEIF Expenditures and Encumbrances: \$0.61 million*

### *Beneficiaries*

Clean energy businesses and non-profits are eligible for this program and projects can be located at businesses, non-profits, and government owned facilities.

### *Description*

The Game Changer Competitive Grant Program was offered for the fourth time in FY16. Through the program, MEA supports the deployment of innovative clean energy projects in the State of Maryland. Generally, Game Changer projects must display the potential to significantly advance the State's clean energy market, using commercially available technologies in projects that are physically located in Maryland. As the electric industry evolves more rapidly than ever before, the program has helped Maryland businesses to remain at the forefront of clean energy deployment. This year, all three grant awards incorporated an existing or new renewable energy system with a battery storage system. Marrying these technologies can provide many economic and societal benefits including (but not limited to) providing back up power and islanding critical loads, frequency regulation, load balancing, and increasing reliability of intermittent renewable energy systems.

### *Program Details*

Projects awarded grant funds in Fiscal Year 2016 are still being constructed, installed, and/or commissioned. For this reason, the summary below shows estimated project metrics and economic benefits associated with Fiscal Year 2016 grants, which are subject to change.

<b>Fiscal Year</b>	<b>FY16</b>
# of grants	3
Renewable Energy Capacity* (kW)	7,194
Electric Storage Power Capacity (kW)	1,450
Electric Storage Energy Capacity (kWh)	1,350
Estimated Annual Economic Benefit (\$)	110,500

\*Note: All FY16 projects paired renewable energy with battery storage systems; however grant funding was used only for battery storage and advanced controls. MEA felt it was important to list the amount of renewable energy capacity incorporated in the projects.

## **H. Offshore Wind Programs**

SEIF Expenditures and Encumbrances: \$2.82 million

Non-SEIF Expenditures and Encumbrances: \$53,226\*

### *Beneficiaries*

This program provides funds to emerging businesses, non-profits and State, Local, and Municipal governments and their agencies/institutions.

### *Description*

The Offshore Wind Program includes the Offshore Wind Development Fund (OSWDF) and the Offshore Wind Business Development Fund (OSWBDF)\*. These funds are used respectively for development of an offshore wind project and creation of an offshore wind-related business supply chain in Maryland.

The Offshore Wind Development Fund is used for phase one development of an offshore wind project which includes environmental surveys and wind resource characterization campaigns. These type of activities help defray the costs and speed the efforts of an offshore wind energy developer to successfully navigate the Bureau of Ocean Energy Management's (BOEM) Environmental Impact Statement process, which requires submission of a Site Assessment Plan and a Construction and Operations Plan.

The Offshore Wind Business Development Fund is used to assist emerging businesses, including minority owned emerging businesses, interested in participating in the global offshore wind industry and business supply chain. The Offshore Wind Business Development Fund is also used to provide financial assistance to businesses entering the industry, as well as for workforce development.

### *Program Accomplishments*

New encumbrances from the Offshore Wind Development Fund in Fiscal Year 2016 were used to provide (1) a loan to an offshore wind energy project developer for the design, construction, installation, and operations of a meteorological tower ("met tower") in the Maryland wind energy area (WEA), and (2) ongoing grant funding to the Business Network for Offshore Wind (B-NOW) to continue its efforts to organize Maryland businesses entering the offshore wind industry.

Through existing Memorandums of Understanding (MOU), the Maryland Department of Natural Resources (DNR) and the University of Maryland, Baltimore County (UMBC) made progress towards its ongoing research for the Offshore Wind Programs. Additionally, DNR was approved to begin preparation for a study on noise impacts on black seabass health and displacement in the WEA. This study is anticipated to be completed in Fiscal Year 2017.

In Fiscal Year 2016, funds from the Offshore Wind Business Development Fund were used for an ongoing MOU with the Small Business Development Center (SBDC) at the University of Maryland. Through this MOU, the SBDC partnered with B-NOW to identify emerging businesses, including minority owned emerging businesses interested in entering the global offshore wind industry and business supply chain. SBDC and B-NOW provided information to identified businesses on how to work with offshore wind developers.

\*Note: The Maryland Offshore Wind Energy Act of 2013 created and housed the Offshore Wind Business Development Fund within MEA, but separate from the SEIF. MEA has included expenditures from the Offshore Wind Business Development Fund in SEIF Reports in the past and is doing so again for consistency.

## **I. Community Wind**

*SEIF Expenditures and Encumbrances: \$23,504*

### *Beneficiaries*

This program benefits businesses, non-profits, and government entities across Maryland. Community wind projects are projects of up to 750 kW that benefit a local community.

### *Description*

Through the State Anemometer Loan Program, MEA helps defray risk and upfront costs associated with wind speed data collection campaigns that are required to develop a community scale wind project. MEA owns four anemometer towers which can be deployed to collect wind speed and temperature data for interested entities across the State. The data is made publically available through an online portal, enabling potential community wind project development.

### *Program Accomplishments*

In FY16, the Community Wind program purchased necessary replacement equipment for the refurbishment of the anemometer towers, which were redeployed in new locations in early Fiscal Year 2017.

## J. Transportation

*SEIF Expenditures and Encumbrances: \$3.60 million*

### *Beneficiaries*

Beneficiaries include homeowners, businesses, nonprofits, and State and local government entities that install alternative fuel refueling/charging infrastructure or purchase alternative fueled vehicles.

### *Description*

MEA runs incentive programs that aim to reduce petroleum use in Maryland's transportation sector while saving car owners and fleets money through reduced fuel, operations and maintenance costs. The programs work to accomplish this goal by increasing the number of alternative fueled vehicles and amount of alternative fuel refueling/charging infrastructure in the State. These programs include:

- Electric Vehicle Supply Equipment (EVSE) Rebate Program
- Alternative Fuel Infrastructure Program (AFIP)
- Freedom Fleet Voucher Program (FFVP)

### *Program Accomplishments*

<b>Fiscal Year</b>	<b>FY16</b>
# of EVSE rebates issued	313
# of AFIP DC Fast charging stations/locations	14/14
# of AFIP Compressed Natural Gas refueling stations/locations	2/2
# of AFIP propane refueling stations/locations	2/2
# of alternative fuel vehicles awarded	190
Total estimated annual petroleum displacement	1,365,643 gallons*

\*Note: This is a conservative figure which only accounts for FFVP and AFIP programs.

## **K. Combined Heat and Power Grant Program**

*SEIF Expenditures and Encumbrances: \$5.40 million*

### *Beneficiaries*

The Combined Heat and Power (CHP) Grant Program encourages the implementation of CHP technologies in Maryland's critical infrastructure, such as healthcare and wastewater treatment, as well as industrial facilities.

### *Description*

In fiscal year 2015, the Maryland Energy Administration (MEA) launched a program to encourage Combined Heat and Power (CHP) development, targeting healthcare and publicly owned wastewater treatment facilities throughout Maryland. These two industries were selected because of the inherent requirement for enhanced electricity resiliency. In fiscal year 2016, the CHP program was expanded to target industrial manufacturers as well as critical infrastructure facilities. In addition, the program also targeted projects that leveraged biogas or biomass as a fuel source in industrial manufacturers or critical infrastructure facilities.

The commissioning of CHP systems will improve efficiencies, reduce greenhouse gas emissions, and can result in lower operational costs.

### *Program Accomplishments*

In response to the program, MEA received applications providing for the potential of over twenty-two megawatts (22.8 MW) of new CHP capacity. Out of those applications, CHP projects providing over fourteen megawatts (14 MW) of capacity have entered into the design/implementation phase using fiscal year 2016 funds. The systems are expected to be fully commissioned by January 1, 2018.

## L. Animal Waste to Energy Pilot Program

*SEIF Expenditures and Encumbrances: \$2.20 million*

### *Beneficiaries*

The Pilot Animal Waste to Energy Grant Program offers financial incentives to any entity that could benefit from the installation and production of equipment to process animal waste to energy. Program participants include two on-farm scale projects processing two different types of waste.

### *Description*

The Pilot Animal Waste to Energy Grant Program resulted from the recognition that there is proven potential in converting animal waste to energy through the anaerobic digestion process. Beyond the energy benefits, the program also assists with the removal of key nutrients from the Chesapeake Bay Watershed. The projects can also result in byproducts that can be used beneficially and as a commodity. The program was limited to pilot scale projects (<2MW) by design, in order to provide proof of concept. It is anticipated that the program will provide sufficient information for participating developers to scale-up this technology.

### *Program Accomplishments*

The two projects funded through this program have long lead times and are therefore still being installed. The annual estimates listed below reflect projections of the electricity production that is anticipated from program-funded projects, but are subject to change.

<b>Fiscal Year</b>	<b>FY16</b>
# of grants awarded	2
Annual Electricity Production (kWh) *	2,800,000

\*Note: Annual production estimates are based on the assumption that the system will operate at an 80 percent capacity factor and accounts for the parasitic load used by the anaerobic process itself.

## **M. Energy Technical Support**

*SEIF Expenditures and Encumbrances: \$1.43 million*

### *Beneficiaries*

Beneficiaries include all Marylanders.

### *Description*

MEA funds technical support for initiatives that support the State's energy efficiency, renewable energy, and transportation initiatives, improve energy reliability and resiliency, and reduce energy bills. Technical assistance funding may be used to develop and implement energy programs, conduct feasibility studies, and train and communicate information on important energy topics to targeted audiences. Some uses of technical assistance include the following:

- Implementation support for MEA energy programs;
- Development of a request for information (RFI) on poultry-waste-to-energy options;
- Analysis of solar job opportunities for underserved populations;
- State cost share on a federal award from the U.S. Department of Energy (DOE) looking at energy performance contracting assistance for local governments and housing authorities;
- A loan to the Motor Vehicle Administration for technical assistance on an energy performance contracting (EPC) project;
- Evaluation, measurement, and verification services for energy programs; and,
- Community outreach and education related to electric vehicles and electric vehicle infrastructure technologies.

## **N. Communications and Marketing**

*SEIF Expenditures and Encumbrances: \$675*

*Beneficiaries*

All Marylanders

*Description*

The communications budget was used to reserve a booth at the Maryland Municipal League (MML) annual conference, allowing the Maryland Energy Administration to communicate energy program offerings to local government officials across the State.

## **O. Administration**

*SEIF Expenditures and Encumbrances: \$3.09 million*

### *Beneficiaries*

All Marylanders benefit from the efforts that occur under the SEIF.

### *Description*

In addition to joining the Regional Greenhouse Gas Initiative, Maryland has enacted:

- The EmPOWER Maryland Act that seeks a 15 percent reduction of both per capita peak demand and overall electricity consumption by 2015;
- a 20 percent renewable portfolio standard by 2022; and,
- a 40 percent reduction in greenhouse gas emissions by 2030, as enacted in 2016.

In order to help meet these goals, MEA manages and enables numerous programs and initiatives that increase the use of clean energy, renewable energy, and energy efficiency technologies among every sector in the State. Funding used for administration has allowed MEA to administer energy programs described throughout this report. MEA continues to design and launch new programs ensuring its place as a national leader in energy.

### *Program Accomplishments*

While MEA's SEIF accomplishments have been well chronicled in the programs described in the previous sections, there have been many other areas of MEA focus that receive administrative funds in the form of staff time. As examples, during FY16 MEA staff issued a report on energy storage considerations in Maryland; managed multiple federal grant awards from the U.S. Department of Energy (DOE) designed to help improve energy efficiency, including a project to help expand opportunities for energy performance contracts (EPCs) among Maryland's local governments and public housing authorities; and participated in various collaborative efforts such as the Electric Vehicle Infrastructure Council and the Animal Waste Technology Fund Advisory Board.

**P. Maryland Clean Energy Center**

*SEIF Expenditures and Encumbrances: \$0.26 million*

*Beneficiaries*

Maryland Clean Energy Center

*Description*

Provided the Maryland Clean Energy Center with stopgap funding for operations.

*Program Accomplishments:*

**Maryland Home Energy Loan Program (MHELP):** This lending program targeted residential property owners making home energy improvements. Private sector capital was leveraged to address market demand through a program underwritten by Mariner Finance.

<b>Fiscal Year</b>	<b>FY16</b>
# of loans	725
Total value of loans made (\$)	\$5.5 million+
Annual Electricity savings (kWh)	~2 million kWh
Hours worked by contractors	~10,200

**Maryland Property Assessed Clean Energy (MD-PACE):** MD-PACE for commercial property launched in December 2014 and is administered through a partnership with Pace Financial Servicing, LLC. PACE requires an enabling ordinance at the local level. MCEC worked with several counties and Baltimore City to facilitate the process of enacting local enabling ordinances. Of the 24 primary jurisdictions targeted for enrollment, five (5) counties have passed local enabling ordinances as of June 30, 2016.

**MarylandSAVES™ Green Community Program Developed:** MCEC developed the MarylandSAVES™ Green Community Program to offer financing to Maryland local government, institutional, commercial, and industrial properties for qualified energy conservation measures. A federally-subsidized interest rate is enabled through the use of Qualified Energy Conservation Bonds (QECBs) allocated to local governments and issued on a conduit basis through MCEC. The Program launched in May 2016 and is administered through a partnership agreement with CleanSource Capital, LLC.

**Additional Activities:** In addition, MCEC finalized the 2015 Green Bank report, hosted a related forum, and participated in the 2016 legislative session review of Green Bank options for Maryland. MCEC also led and staffed the workgroup required by 2016’s House Bill 387, Clean Energy Loan Program – Residential Property – Study.

## NON-MEA PROGRAMS

### Q. Department of Human Resources Low Income Bill Payment

*SEIF Encumbrances and Expenditures: \$42.10 million\**

#### *Beneficiaries*

Low-income Maryland families needing assistance paying their energy bills. The eligibility requirement is 175% of the Federal Poverty Level.

#### *Description*

The Office of Home Energy Programs (OHEP) within the Maryland Department of Human Resources uses SEIF funds to provide electric assistance benefits to eligible low-income households. SEIF funds are used for Electric Universal Service Program (EUSP) Bill Payment Assistance and Arrearage Retirement Assistance benefits. EUSP Bill Payment Assistance benefits are used to help make ongoing electric bills more affordable. Benefit amounts are based on electric usage and household income with a portion of electric bills being paid by the benefit. EUSP Arrearage Retirement Assistance is used to retire past due bills up to a maximum amount of \$2,000. A benefit is available once every seven years. EUSP Supplemental Benefits are issued to address customer need in the post-winter months when mandated customer disconnection protections are no longer in effect and service terminations increase. Benefits were paid directly to electric utilities on the applicant's behalf. No SEIF funds were used for OHEP administrative functions.

#### *Program Accomplishments*

The program prevents and resolves utility disconnections through its arrearage and bill assistance grants. The EUSP Arrearage Retirement Assistance program directly prevents or resolves disconnections that may result in life-threatening health and safety concerns or result in households becoming homeless. Bill assistance and supplemental benefit grants keep bills at an affordable level so customers do not end up in a utility crisis in the first place. In FY16, the average bill assistance benefit was \$394 while arrearage assistance averaged \$1,003.

<b>EUSP Program (FY16)</b>	<b>Amount</b>	<b>Households Served</b>
Bill Assistance	\$ 8,519,689	102,947
Arrearage Retirement	\$16,352,670	16,331
EUSP Bill Asst. Supplemental Benefit	\$17,225,778	94,963
FY2016- Accrual	\$8,660	15
<b>Total Benefit</b>	<b>\$42,106,797</b>	<b>102,947**</b>

\* \$7.31 million provided in FY17 to support DHR FY16 operations.

\*\* Arrearage and Supplemental Benefit recipients are a sub-set of EUSP Bill Assistance recipients.

## R. Department of Housing and Community Development

*SEIF Expenditures and Encumbrances: \$1.00 million*

### *Beneficiaries*

Customers of the Department of Energy (DOE) Weatherization Assistance Program (WAP) benefit from this funding. WAP is implemented to increase the energy efficiency of homes owned or occupied by low income persons (at or below 200% of poverty) or to provide such persons renewable energy systems or technologies, reduce their total residential expenditures, and improve their health and safety. Under the DOE WAP, priority is given to eligible participants who are particularly vulnerable such as the elderly, disabled, high residential energy users, high energy burden, and families with children.

### *Description*

SEIF funds are critical to the WAP and are leveraged in order to deliver services that complement or enable, but are generally outside the approved scope of federal WAP funding. This might include health and safety repairs beyond allowable limits, HVAC or fossil fuel furnace repairs and replacement, and standard weatherization measures beyond allowable limits.

<b>Fiscal Year</b>	<b>FY16</b>
# of participating homes	82

<b>Avoided Annual Energy Savings by fuel type</b>	<b>kWh</b>	<b>Therms</b>	<b>MMBTUs</b>
Oil-heated homes	7,484.63	0.00	192.47
Natural gas-heated homes	209.31	751.89	57.07
Coal-heated homes	0.00	0.00	0.00
Electric-heated homes	24,446.88	0.00	52.06

## **S. Maryland Department of the Environment**

*SEIF Budget: \$2.80 million*

### *Beneficiaries*

All Marylanders benefit from the efforts undertaken by the Maryland Department of Environment (MDE)

### *Description*

Expenditures in FY16 include:

- MDE staffing and operations, including expenses for Air Quality Planning Program, Mobile Source Program, Air Director, Compliance Program, Permits Program, Air Monitoring Program, and Legal Program.
- Contractual assistance for tasks beyond the expertise of MDE staff, such as economic analyses, and for securing, as necessary, additional resources to assist in implementing the Greenhouse Gas Emissions Reduction Act of 2016.
- Support for Maryland's involvement with RGGI, Inc., the regional organization that assists the member states with the operational aspects of the Regional Greenhouse Gas Initiative (RGGI) program. Member states are required to pay dues to RGGI, Inc. for their share of the operational costs of the auction platform for the cap and invest program that generates the SEIF funds, as well as the development of the modeling platform, development of a public access database tracking the distribution of allowances, and utilization of a market monitor to review the results of each auction for possible market manipulation. Revenues from the RGGI program fund the climate planning process and support implementation of energy programs. Maryland and the other RGGI states are now preparing to complete a comprehensive RGGI program review in 2016.
- The Northeast States for Coordinated Air Use Management (NESCAUM) is a nonprofit association of air quality agencies in the Northeast to assist member states in implementing national environmental programs required under the Clean Air Act and other federal legislation. MDE contracted with NESCAUM to facilitate the work of the Multi-State Zero Emission Vehicle (ZEV) Implementation Task Force. NESCAUM was tasked with coordinating and facilitating stakeholder coordination, coordinating technical and policy analyses for Maryland, supporting California Air Research Board (CARB) efforts to develop and maintain web-based Credit Tracking tool, and drafting reports, white papers, and meeting materials, including overseeing graphic design and printing.

## T. Electric Vehicle Excise Tax Credit

*SEIF Reimbursement: \$1.29 million*

### *Beneficiaries*

Anyone who registers a new electric vehicle (EV) in the State of Maryland is eligible for the tax credit, up to available funding levels.

### *Description*

In 2010, the legislature passed a credit against the motor vehicle excise tax for certain qualified plug-in electric drive vehicles. This was a three year program and each vehicle was eligible for up to \$2,000. In 2013, the legislature extended the statute by one year and changed the incentives to be tiered based on vehicle kWh battery capacity. In 2014, the legislature extended the statute by 3 years and changed the tiered system to a flat \$125/kWh of battery capacity up to \$3,000.

SEIF funds were used to reimburse the Treasury for electric vehicle excise tax credits claimed during tax year 2015.

### *Program Accomplishments*

To provide the most recent program results, the activity described below reflects fiscal year 2016 rather than historical activity from calendar year 2015 reimbursed in fiscal year 2016.

<b>Fiscal Year</b>	<b>FY16</b>
# of tax credits*	698
Sum of tax credits funded by SEIF	\$1,287,000
Sum of tax credits funded by MDOT	\$511,825
Total sum of tax credits issued	\$1,798,825
Estimated private \$ leveraged	\$31,102,224
Annual savings (Gasoline Gallon Equivalents (GGE))	2,047,910

\*Note: Tax credit information provided by the Motor Vehicle Administration.

## **U. Department of General Services**

*SEIF Expenditures and Encumbrances: \$0.42 million*

### *Beneficiaries*

State agencies and Maryland taxpayers benefit from this program.

### *Description*

Within the Department of General Services (DGS), the DGS Energy Office works closely with MEA to encourage energy efficiency and conservation. The DGS Energy Office implements several initiatives throughout state government to include agency energy planning; energy performance contracting; energy use tracking, energy commodities purchasing; demand response planning; and renewable energy sourcing.

### *Program Accomplishments*

Through this program, DGS accomplished the following:

- Purchased electricity and gas in the deregulated market on behalf of all state agencies, as well as electricity for the University System of Maryland.
- Participated in the PJM Demand Response Program, which is designed to promote changes in electric usage by state agencies in response to: 1) changes in the price of electricity over time; or 2) incentives designed to induce lower electricity use at times of high wholesale market prices or when system reliability is jeopardized.
- Updated state agency energy plans. State agencies work with the DGS Energy Office to produce an agency energy plan that identifies energy consuming units and recommends energy conservation measures with the greatest potential for energy savings.
- Encouraged the adoption of energy performance contracting projects by state agencies. An Energy Performance Contract (EPC) is a financing technique that allows state agencies to acquire energy savings and facility improvements without up-front capital expenses.

## **V. DBM State Energy Loan Repayments**

*SEIF Expenditure and Encumbrances: \$3.14 million*

### *Beneficiaries*

State agencies benefit from this program.

### *Description*

In Maryland, general funds normally pay for state agencies' energy bills. To lower those bills, many state agencies are currently participating in energy performance contracts (EPCs). EPCs are intended to be self-funded: the state is supposed to take out loans to pay for energy improvements through the EPC, and the annual energy savings from those improvements are guaranteed to be more than enough to repay those loans. However, instead of using the energy savings to repay the loans, the State has chosen to use SEIF funds to repay the loans, thereby freeing up general funds to address other needs in the State budget.

### *Program Accomplishments*

Investments in this program freed up \$3.1 million of General Funds that otherwise would have to pay State Agencies' energy bills.

## APPENDIX A: SEIF Funding Details

Strategic Energy Investment Fund (SEIF) Expenditures					
Expenditures	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
	<i>Actual</i>	<i>Actual</i>	<i>Actual</i>	<i>Actual</i>	<i>Actual</i>

## APPENDIX B: FY16 Grantees Receiving Multiple SEIF Awards

Enrolled Chapter 507 of the 2016 Maryland legislative session added a requirement that the annual report on the uses of the Strategic Energy Investment Fund identify multiple grants awarded to the same individual or address. To comply with this requirement, Appendix B contains a summary of individuals and/or addresses identified by MEA as receiving multiple awards from the Strategic Energy Investment Fund in fiscal year 2016.

There are several ways that non-profit organizations, local governments, and businesses can be eligible for multiple awards in a given fiscal year from the Strategic Energy Investment Fund. A list of entities receiving multiple awards in fiscal year 2016 can be found in Table 1 below. Examples of ways that an entity can receive multiple awards include:

- As described earlier in this report, a portion of the Clean Energy Communities low-to-moderate income program is offered on a county-by-county basis to ensure geographical diversity. In this way, a non-profit that wishes to implement projects in several counties could submit applications in each county, resulting in the possibility of multiple awards.
- Under the Commercial Clean Energy Grant program, an applicant may receive multiple awards if two different renewable energy technologies are installed in the same location.
- The Transportation program’s commercial Electric Vehicle Supply Equipment rebates and Alternative Fuel Infrastructure Program allows commercial entities to be eligible to receive multiple awards if multiple stations have been installed.
- Through the Freedom Fleet Voucher program, motor carrier participants can receive awards for multiple vehicles, up to an annual cap.

**Table 1: Non-residential Entities Receiving Multiple SEIF Awards in Fiscal Year 2016**

Program Name	MEA Award Name	Award Amount
Clean Energy Comm. Low-to-Moderate Income	Associated Catholic Charities (Baltimore County)	\$ 60,000
Clean Energy Comm. Low-to-Moderate Income	Associated Catholic Charities (Garrett County)	\$ 50,000

Clean Energy Comm. Low-to-Moderate Income	Tuckahoe Habitat for Humanity (Queen Anne's County)	\$ 100,000

As an individual, one way that it is possible to receive multiple awards from the Strategic Energy Investment Fund is by participating in the Clean Energy Grant Program after installing more than one renewable energy technology. Another potential way is to participate in the Clean Energy Grant Program in conjunction with the Electric Vehicle Supply Equipment rebate program, which provides financial incentives for electric vehicle charging equipment. In fiscal year 2016, MEA has identified seventy-six individuals corresponding to sixty-seven addresses who have received multiple awards from the Strategic Energy Investment Fund. A list of the individuals who individually received multiple awards, or whose address received multiple awards, is shown below in Table 2.

**Table 2: Individuals who have received(or whose address has received) multiple SEIF awards in fiscal year 2016**

## Appendix C: Fiscal Year 2016 Grantees

The following pages contain a list of more than three thousand awards issued by the Maryland Energy Administration in FY16. Awards are organized first by program, using the program order shown in the Table of Contents, and then alphabetically within each individual program. To further aid in the navigation of Appendix C, each award is preceded by the name of the program and the letter assigned to the program in the Table of Contents.

The fiscal year 2016 program with the largest number of participants by far is the Residential Clean Energy Grant Program. A list of incentives, by technology, for this program is shown below for reference.

Technology	Award
Solar Photovoltaics (PV)	\$1,000/project
Solar Water Heating (SWH)	\$500/project
Geothermal Heating & Cooling (GHC)	\$3,000/project
Geothermal Heating & Cooling (GHC) replacement	\$500/project
Wind	\$3,000 per kW of normalized capacity
Stick (wood) Burning Stove	\$500/installation
Pellet Burning Stove	\$700/installation

MEA Program	Program Name	MEA Award Name	Award Amount
A	Clean Energy Comm. Low-to-Moderate Income	Arundel Community Development Service (Anne Arundel)	\$126,250
